Work Experience

UI/UX Engineer

You-Source • Jan 2024 - Current

- Designed interfaces for two separate production mobile applications—one in digital health and one in food & beverage—contributing to MVP development and core user flows for each.
- Built an internal AI tooling extension for rapid prototyping and design-fidelity validation, reducing manual handoff work between design and engineering.
- Built a fully coded, interactive prototype for a tennis tournament admin app, utilizing an AI workflow end-to-end.
- Developed responsive Flutter UI components from Figma designs, using AI coding tools to accelerate development while maintaining design accuracy.
- Collaborated with PMs, developers, and QAs in an Agile workflow to iterate on UI features and improve product usability.
- Led moderated think-aloud usability testing, identifying usability issues in ordering flows and fund management and delivering UX recommendations to improve task completion.
- Led the design of a web-based ERP application for an Australia-based welding company, aligning interface solutions with business and operational requirements.
- Designed and developed landing pages in Webflow, supporting marketing campaigns and brand initiatives.
- Communicated design decisions to clients, explaining UX patterns and rationale to align with stakeholder priorities and business goals.

Skills

Design

- UI Design, Prototyping, UX Research, Usability Testing, Wireframing, Journey Mapping, Design Systems, Interaction Design

Technical

- HTML/CSS, Flutter, Tailwind CSS, Git, AI-Assisted Development

Tools

- Figma, NotebookLM, ChatGPT/Codex, VSCode, Claude, Notion, Adobe Firefly

Education

FEU Institute of Technology

2019 - 2024

- Bachelor of Science in Computer Science with specialization in Software Engineering
